HOW TO USE THE GUIDE TO INDIAN PERIODICAL LITERATURE

The Guide is a subject-author index to articles and other reading material appearing in over 400 Indian journals in the fields of Social Sciences and Humanities. The entries have been arranged alphabetically on the dictionary pattern.

Headings :

Whenever possible, entries are made under "subject" headings, *e.g.* Agriculture, Architecture, Community development, Folklore. Under geographic headings will be found, usually, material on the government, general defences, economic conditions, politics and social conditions etc., of the country, *i.e.* material too broad to be classified under subject headings. Entries are made under the most specific heading *e.g.*, material on Jute has been listed under 'Jute' or 'Jute ustry and trade' and not under 'Fibres', except where the amount of material is too small or where it is advantageous to collect related material under a single heading.

Sub-Divisions :

Headings are subdivided whenever the amount of material entered there warrants it and the nature of the material permits it. The two types of subdivisions used in the Guide are (i) subheads (set in bold face type) and (ii) second subheads (set in light face italics). These subheads are also arranged in alphabetical order. Exceptions have been made in the case of headings which have been subdivided by general subheads as well as geographically in which case general subheads precede the geographical subheads. Thus Education—Standards will precede Education—India. Second subheads are also arranged alphabetically under the first subheads.

Alphabetization :

Headings are alphabetized on the word by word basis. Inverted headings precede uninverted headings. Abbreviated headings *viz.*, AIR appear at the beginning of each alphabet.

Inversions :

Multiple-word headings are inverted if a word other than the first is deemed to be the "key word" in identifying the heading (e.g. articles on American economic assistance are listed under 'Economic assistance, American', and not under 'American economic assistance').

Entries :

There are at least two entries for each article—an author entry and a subject entry except where there is no author. Additional subject entries have been made wherever the articles deal with more than one subject. The entries under subject headings are also arranged alphabetically.

Bibliographic Data :

Each entry starts with the title of the article followed by the name of the author (where there is any), the abbreviated title of the journal, volume and issue number, page numbers and other information such as illustrations, bibliography etc. A plus (+) sign following the page number indicates that the article has been carried over to some other page in the same issue. Explanations of other abbreviations used in the Guide have been given under "Abbreviations & Signs." A sample entry given under "Abbreviations & Signs" will illustrate the above procedure.

Cross-References :

All related headings are covered by cross-references or by duplicate entries. While a 'See also' reference draws attention of the readers to related subject headings which they might usefully look up, a 'See' reference indicates that entries have been listed under the subject heading to which the reference has been drawn.

INDEX TO INDIAN PERIODICAL LITERATURE

1963

Rs. 200.00 : $ 40.00 : £ 20.00

HOW TO USE THE GUIDE TO INDIAN PERIODICAL LITERATURE

The Guide is a subject-author index to articles and other reading material appearing in over 400 Indian journals in the fields of Social Sciences and Humanities. The entries have been arranged alphabetically on the dictionary pattern.

Headings :

Whenever possible, entries are made under "subject" headings, *e.g.* Agriculture, Architecture, Community development, Folklore. Under geographic headings will be found, usually, material on the government, general defences, economic conditions, politics and social conditions etc., of the country, *i.e.* material too broad to be classified under subject headings. Entries are made under the most specific heading *e.g.*, material on Jute has been listed under 'Jute' or 'Jute Industry and trade' and not under 'Fibres', except where the amount of material is too small or where it is advantageous to collect related material under a single heading.

Sub-Divisions :

Headings are subdivided whenever the amount of material entered there warrants it and the nature of the material permits it. The two types of subdivisions used in the Guide are (i) subheads (set in bold face type) and (ii) second subheads (set in light face italics). These subheads are also arranged in alphabetical order. Exceptions have been made in the case of headings which have been subdivided by general subheads as well as geographically in which case general subheads precede the geographical subheads. Thus Education—Standards will precede Education—India. Second subheads are also arranged alphabetically under the first subheads.

Alphabetization :

Headings are alphabetized on the word by word basis. Inverted headings precede uninverted headings. Abbreviated headings *viz*., AIR appear at the beginning of each alphabet.

Inversions :

Multiple-word headings are inverted if a word other than the first is deemed to be the "key word" in identifying the heading (e.g. articles on American economic assistance are listed under 'Economic assistance, American', and not under 'American economic assistance').

Entries :

There are at least two entries for each article—an author entry and a subject entry except where there is no author. Additional subject entries have been made wherever the articles deal with more than one subject. The entries under subject headings are also arranged alphabetically.

Bibliographic Data :

Each entry starts with the title of the article followed by the name of the author (where there is any), the abbreviated title of the journal, volume and issue number, page numbers and other information such as illustrations, bibliography etc. A plus (+) sign following the page number indicates that the article has been carried over to some other page in the same issue. Explanations of other abbreviations used in the Guide have been given under "Abbreviations & Signs." A sample entry given under "Abbreviations & Signs" will illustrate the above procedure.

Cross-References :

All related headings are covered by cross-references or by duplicate entries. While a 'See also' reference draws attention of the readers to related subject headings which they might usefully look up, a 'See' reference indicates that entries have been listed under the subject heading to which the reference has been drawn.
